

MindCare – AI Mental Health

User Manual

1. Introduction

MindCare – AI Mental Health is an intelligent mental wellness application developed to help users understand, monitor, and improve their emotional well-being. The application combines Artificial Intelligence, mood tracking, emotion analysis, wellness recommendations, emergency support, and chatbot assistance to provide a comprehensive mental health support platform.

2. Purpose of the Application

The primary objective of MindCare is to provide users with a smart and accessible platform for monitoring mental health, tracking emotional patterns, receiving personalized recommendations, and obtaining immediate support whenever needed.

3. User Registration

To create an account:

1. Open the MindCare application.
2. Select the **Register** option.
3. Enter your Full Name.
4. Enter a valid Email Address.
5. Create a secure Password.
6. Click **Create Account**.

After successful registration, the user account will be securely stored and ready for login.

4. User Login

1. Open the Login screen.
2. Enter your registered Email Address.
3. Enter your Password.
4. Click **Login**.

Upon successful authentication, the user will be redirected to the MindCare User Dashboard.

5. Dashboard Overview

The User Dashboard provides quick access to the following features:

- Mood Check-in
- AI Emotion Analysis
- Wellness Center
- Mood History
- Emergency Support
- AI Chat Assistant
- User Profile
- Settings

6. Mood Check-in

The Mood Check-in feature allows users to record their emotional state.

Steps:

1. Select your current mood.
2. Set your stress level using the slider.
3. Click **Submit**.

The data will be saved and used for analytics and personalized recommendations.

7. AI Emotion Detection

This feature uses Artificial Intelligence to analyze facial expressions through the device camera.

Capabilities:

- Detect Happy emotions
- Detect Sad emotions
- Detect Neutral emotions
- Detect Stressed emotions
- Detect Anxious emotions

The system provides confidence-based predictions to improve emotional awareness.

8. Mood History Tracking

Users can review previous emotional records and monitor mental health progress over time.

Benefits:

- Track emotional trends
 - Review mood patterns
 - Analyze stress levels
 - View wellness progress
-

9. Wellness Center

The Wellness Center provides personalized mental health support based on the user's latest mood and stress levels.

Recommendations may include:

- Relaxation techniques
 - Breathing exercises
 - Meditation activities
 - Self-care suggestions
 - Wellness guidance
-

10. AI Chat Assistant

The AI Chat Assistant offers real-time conversational support.

Users can:

- Ask mental wellness questions
- Receive motivational guidance
- Get emotional support
- Access personalized recommendations

The chatbot is available 24/7.

11. Emergency Support

The Emergency Support feature allows users to contact trusted individuals during difficult situations.

Features:

- Trusted contact management
 - SOS alert functionality
 - Emergency communication support
-

12. User Profile

Users can:

- View personal information
 - Update account details
 - Manage preferences
 - Access account settings
-

13. Navigation Menu

The navigation drawer provides access to:

- Home
 - Profile
 - Mood Check-in
 - Mood History
 - Wellness Center
 - AI Chatbot
 - Emergency Support
 - Settings
 - Privacy Policy
 - Contact Information
 - Logout
-

14. Logout

To securely sign out:

1. Open the Navigation Menu.
2. Select **Logout**.

3. The application will clear the active session and redirect to the Login screen.

15. Contact Information

For support and assistance:
